

# M.F.D. Modular Flight Deck

FAA and Canadian Approved

*Precision Flight Controls, Inc.*

The Dual and Single MFDs offer more features than any other **AATD** on the market today. The MFDs integrated Flight Deck that's Ergonomic and Durable make it a powerful training tool that is unmatched in price or features.

The Dual or Single MFD defines an entirely new class of flight training equipment, from its full sized detailed panel to the rugged pedals resting under your feet. The MFD includes many features and options including a fiberglass enclosure, aluminum floor and seat track system, adjustable leather seats and backlit panels just to name a few.

The MFD is perfect for beginning, advanced and Crew Training. MFDs are currently in use by FBO's, Universities, Flight Schools and Airlines all over the world. Our hardware has set the standard in original design and engineering for years to come. Durable internal aluminum castings coupled to our custom hydraulic dampers provides a realistic feel, while an ergonomic panel powered by state of the art digital electronics immerses you into the simulation. This is a system that imaginatively blends advanced technology and reliability with low acquisition, operating and maintenance costs.

If you operate a multiple-aircraft flight department the Dual or Single Professional Flight Deck is a reliable, efficient and affordable ingredient for your companies success. No other flight console has ever been designed with such advanced technology which is why no other console has ever performed like it,
